like it!

music+vid

"some hand" in the video reminds me of the cool-peter-jackson-time ,-)

one note: the intro snd+fx is too dominating - BBABABAPAMM BABABPAMM, ok it makes sense, as contradiction works, but ... (just my op.)

probably (I'm still hearing the music): reverse some "sphere" part (-100/sound) (intro) let it go to +100 and go on ... (for the intro)

Yes. The Begining and ending, the thing with the window, is made with Fusion 7 from Blackmagic design. There a lot of greenscreen stuff. The makeup fx is also selfmade. With a lot of latex
