

Cineform raw codec test,

Posted by David Rasberry - 25 Mar 2016 01:27

Cineform raw graded in Lightworks and exported to H.264 for Vimeo. Just a video workflow test. No audio.

I mentioned to an associate at work that I had shot some birds at the feeder. He gave me a very questioning look, like why would I do that?

I said "Filming, **FILMING** birds at the feeder." He laughed and looked relieved.

One for the birds.
