

## Miles Davis - and a question about effects

Posted by raeditor - 05 Apr 2016 20:22

---

Here is my latest. I'm getting better, but I still have a way to go. Any feedback welcome.

Question: (I'm not a video guy, so my terminology may be wrong)Is there an easy effect to 'soften' video? I didn't want to go full B/W, but I did want to tone down the color of the guitar clips. I wanted to make it look like 1960's film, also a bit darker. You can see that I tried on the bass guitar clip, but I think it did not come out real good.

Thanks.

The color correction effect give you pretty broad control over all aspects of color and value.
