

## Music video

Posted by Eyemouth - 22 Jul 2016 16:20

---

Never did this kind of video before. It was a lot of fun but quite hard. In the beginning i found it difficult to learn Lightworks, but after a while it kind of got easier.

I read a lot of information on this site so thanks to you all, you got me started!

Wow. That is a lot of work. It's an interesting video. Kind of artsy.

Thank you donk pow!

It was a lot of work. So much to think about. For example, it was not a good idea to use a white boat because it reflected the green screen and almost disappeared when using the chromakey effect. And it took some time to figure out how to do the stop motion. Right now I feel I will never make a video again... but in a week I'm sure that will have change 😊

---

I was totally impressed by the use of stop motion.

If anyone would like to give a suggestion of how to improve the video it would make me happy. But, on the other hand, then, I would be back on 0 views . I haven't made it official yet.

It's a good video, you just need to refine your skills. Go public!

Congratulations, a very nice music video.

### **Eyemouth wrote:**

... And it took some time to figure out how to do the stop motion.

There is free software that will help you generate a flowing movement between your frames. The additional simulated frames calculates the software automatically (with certain restrictions).

Examples: [slowmovideo.granjow.net/videos.html](http://slowmovideo.granjow.net/videos.html)

The old software &quot;slowmovideo&quot; but is no longer maintained.

Thank you so much, both donkpow and schrauber! Now it feels good .

And thank you schrauber for the link! I will try that.

### **Eyemouth wrote:**

... the link! I will try that.

OK. Installation is a bit complicated, ask us in case of problems.

Imports the images by &quot;slowmovideo&quot; (not the video).

The old thread (Lightworks Forum):

[www.lwks.com/index.php?option=com\\_kunena&func=view&catid=7&id=36930&limit=15&limitstart=105&itemid=81](http://www.lwks.com/index.php?option=com_kunena&func=view&catid=7&id=36930&limit=15&limitstart=105&itemid=81)

An alternative program was recommended there:

[www.lwks.com/index.php?option=com\\_kunena&func=view&catid=7&id=83070&limit=81#83070](http://www.lwks.com/index.php?option=com_kunena&func=view&catid=7&id=83070&limit=81#83070)

Maybe it's easier to use? I have not tested it.

Meanwhile, there seems to be a newer version?

Make no mistake - it is my view that you have embarked on an ambitious project and executed it with significant skill. If anyone would like to give a suggestion of how to improve the video it would make me happy. In response to your challenge - please read and consider - Serge Eisenstein's The Film Sense Chapter IV 'Form and Content: Practice' I believe there you may discover concepts to overcome some momentary disconnection between audio and visual dynamics in your work.

How those concepts might be applied to future work remains in your hands.

RWAV, Thank you for your kind words! It means a lot to me. I will for sure read about the audio and visual dynamics.

I am very glad and inspired of all of you!
