

Rate My Editing

Posted by Tyfilms - 12 Aug 2016 03:18

So I'm still really, really new at Lightworks. I've been using it for less than a month. But I made myself an outro (It's only 15 secs) and I was wondering if anybody would rate it. I made the image with Gimp (A free photo editing software like photoshop) and I got the music from a royalty free artist. 1 to 10, how did I do?

Also, the large empty box is where I put last videos thumbnail.

I've moved this to where it belongs.

For some reason all that I get here is a black 4x3 shape with no means of playing the footage. Maybe someone else can see it.

I'm very sorry. I don't know where to put these kinds of topics. I've checked the link and it works fine for me. I'll put different type of link though

I recognized that your creative skills have improved since the last outro from you I saw at youtube. 😊

I wonder what the light grey box in the middle of the picture is used for.

Thanks. It means a lot to know I've improved. The box is where I put my previous videos thumbnail, and an annotation to link it.
