

Lightworks Version 12.6.0.1 Now Available on Mac OS X! (Supports 10.12 Sierra)

Posted by Matt Sandford - 11 Oct 2016 10:24

Today we are releasing 12.6.0.1 on Mac OS X only!

We have received various tweets and forum posts regarding Lightworks failing to start after updating Mac OS X to 10.12 (Sierra) and are pleased to announce that this latest update to Lightworks 12.6.0.1 (Mac only) resolves the startup failure. No other fixes or changes are included in this latest build. The Windows and Linux installers have not been updated.
