

Building a Free Library of Images for Everyone

Posted by Eric Matyas - 18 Jan 2017 09:15

Hi everyone,

I've been building a library of images that you are welcome to freely use in your projects. They might be useful under titles, for visual effects or anything else you can think of. They are all original...all my own work. All I ask is to be attributed as indicated on my homepage:

soundimage.org/

The images are on my "TXR" pages (for "Textures.")

I'm adding new ones all the time, so be sure to check back often. I sincerely hope that some of them are useful. Any and all constructive feedback is welcome and always appreciated. 🙏

All the best,

Eric

Greetings fellow creatives,

I've posted new cartoon-style texture images here:

TXR – GLASS – Cartoon

Some wild textures here...

soundimage.org/txr-glass-cartoon/

TXR – METAL – Cartoon

Some dirty metal textures...

soundimage.org/txr-metal-cartoon/

TXR – ROCK/STONE – Cartoon

soundimage.org/txr-rockstone-cartoon/

Please keep in mind that they are meant to be building blocks rather than polished textures, so feel free to edit / alter / mash / etc., as needed.

Btw, if you happen to have kids (or know someone who does) I've created a learning series that teaches them environmental stewardship in a fun way through stories and characters. It was my first try at making films with a DSLR...(they can be very challenging to work with in the field)...but I think they came out pretty well. The organization I made them for was very happy with them and uses the films all the time...hopefully others can benefit from them as well. Please feel free to share with family, friends, teachers or anyone you know who might find them useful.

soundimage.org/dunes-island/

Enjoy!

Hey there,

I've posted some more wild cartoon-style texture images derived from glass objects:

TXR – GLASS – Cartoon

soundimage.org/txr-glass-cartoon/

As always, please remember that they are meant to be building blocks rather than polished textures, so feel free to edit / alter / mash / etc., as needed.

Don't forget to check out my learning series that teaches environmental responsibility in a fun way through stories and characters. The premise is this:

How can we expect children to be the future stewards of the Earth if they don't feel connected to it??

Please share with family, friends, teachers or anyone who might find it useful.

Have a good week!

I can't believe May is almost over...what the hell happened to spring? I swear...time is going by faster and faster...yikes!

Anyhow, more new cartoon-style (for lack of a better word) texture images are here:

TXR – CONCRETE / PAVEMENT – Cartoon

soundimage.org/txr-concrete-pavement-cartoon/

TXR – GLASS – Cartoon

Some wild textures here...

soundimage.org/txr-glass-cartoon/

TXR – GROUND – Cartoon

soundimage.org/txr-ground-cartoon/

TXR – VEGETATION – Cartoon

soundimage.org/txr-vegetation-cartoon/

If you find my work helpful (especially my music and sounds) please consider making a donation to my website. The synthesizers I use to create the music and sounds that I share with everyone are very expensive...so expensive, in fact, that I have to make monthly payments on them...and donations really help me a lot to pay for them. Thanks in advance...and please feel free to share your projects...I love to see how creative people are using my work!

Greetings fellow creatives,

If anyone is interested, I was recently asked to do an interview for a website called Exilian. Hopefully my answers were entertaining and (somewhat) intelligent...lol. Here's a link if anyone wants to check it out:

exilian.co.uk/articles.php

That said, this week's cool new textures are on the following pages:

TXR – BRICK - Seamless

Some really interesting brick textures.

TXR – ROCK/STONE – Seamless

Some new stone textures that could be used for old roads, paths, castles, etc. Some have grass between the stones, too.

Hey everyone,

For those of you who have been using my original music in your projects, I've had a good number of requests for uncompressed versions of my tracks, so I've begun making them available on Gumroad for a small fee to help support the site. The MP3 files that I make freely available sound very good, but the original uncompressed WAV files really sound incredible...give them a try!

If anyone is curious as to why I didn't upload WAV files onto my site to begin with, the reason is that my web hosting service places limitations on file sizes and WAV files tend to be very large.

Anyhow, it's going to take some time to upload everything, so if anyone has any requests for WAV versions of tracks you happen to like, just drop me an email and I'll upload them to Gumroad for you. Feel free to convert to Ogg (or any format you like.)

That said, this week's new free textures are on the following pages:

TXR – BRICK - Seamless

These might be really nice for castles.

soundimage.org/txr-brick-seamless/

TXR – WOOD – Seamless

Perhaps for old doors, structures, barrels or other things.

soundimage.org/txr-wood-seamless/

More music and ambient sounds coming this week.

Enjoy and keep being creative!
