

## Problem with export

Posted by Kowalski-Ocneanu - 19 Jan 2017 16:46

---

Hello

i have a lightworks 12.6 (free version)

and i has been doing a project recently

all the files i imported to it had the same 25fps and 720p

when i ended project i wanted to export it to mp4 in 720p and with 25fps

everything was going well, exporting had ended succesfully

and then when i tried to play the project it said that it is broken

i reapedted the procedure a lot of times and alwayes it happens

it only fix when i export not to 720p but to 360p

does anyone have any idea what could happen?
