

XK-68 Jog and Shuttle

Posted by geomcd1949 - 20 Apr 2017 22:18

I'd be grateful for a suggestion of what functions to program into the keys of a XK-68 Jog and Shuttle.

Files won't help -- an image of a working keyboard, if key-labels are visible and understandable, would be ideal.

Been using one with MC for years now. Takes some time to program but then it becomes a beast. Totally worth the money!
