

Audio s issues

Posted by johnnypluse - 19 Jun 2018 03:23

☺
hi i just have a quick question . i have footage recorded on camera at 25 fps mov file , my project is set up as a 25 fps also , but the audio seems to drop out of synch . it will work fine and then drop out .

any ideas

Hello,

Unfortunately you don't provide enough information to understand the nature of your problem.

Please post your computer details (OS version, CPU, RAM, GPU, HDD) and a Mediainfo report of the footage. Here you'll find further [information on how to create and post a Mediainfo report](#) .

Please describe the sync issue. Is it present only in preview or also in exported file? Is it fixable by restarting Lightworks? Is audio drifting or shifted by a certain amount (how many frames)? Is sound too late or too early compared with picture?

Do you use separately recorded and imported audio?

Thanks so far, please don't forget about posting the detailed description of the sync issue and the other requested but still missing details.

Thank you for your cooperation.

Re: Audio s issues

Posted by johnnypluse - 19 Jun 2018 08:11

ok , when i put my clip into lightworks and edit it , it plays back in sync but if i play again it goes out of sync . the clip play fine in media player .

Re: Audio s issues

Posted by hugly - 19 Jun 2018 09:50

Ok, but how does it go out of sync, one frame to the left or twenty frames to the right, or is sound drifting maybe, and what happens when you export, and in particular when restarting Lightworks?

Re: Audio s issues

Posted by johnnypluse - 20 Jun 2018 11:57

ok , so when i drop the clips in there in sync , but when i play back the scene the audio and the video is off . its camera footage at 25fps mov format .

What means "off" in "the audio and the video is off"?

=====

Re: Audio s issues

Posted by jwrl - 20 Jun 2018 18:18

In this context it means out of sync.

Ah, good to know.

Hope that OP can offer some kind of more detailed description of the sync issue, otherwise I don't see much of a chance to understand the nature of the problem and we'll stay interested spectators with a good will..
