

PLEASE HELP... accidentally deleted my whole video for my school banquet

Posted by ashlekas - 01 May 2019 09:38

Help me! I deleted my whole end of school year banquet video two days ago and I tried command z and control z and NOTHING is happening. Is there anything I can do to get it back. It took me two months to complete and my banquet is this weekend. 😞

Hello,

The question is, which operation did you use to delete what?

In Edit mode, switch to 'Project Contents' and from 'Filters' select 'Sequences'. Double click to open the sequences there, one by one, to see if you can find the missing.
