

Error messages on import [issue]

Posted by hugly - 04 Jun 2019 03:48

I imported some low frame rates in a 24 fps project, 5, 10, 12.5, 15, 16, 18, 20 fps. Some of those are not supported. The Task log shows the analysed files, but it doesn't show which are imported. It shows three errors, but not which files are affected, 5 times 'Finished', but it doesn't say what.
