

Reverse video

Posted by kamil7 - 06 Jun 2019 10:23

Hi, I am a beginner. Can somebody tell me, how to reverse the video?

Welcome to the forum.

Place the playhead on the clip that you wish to reverse. Right click on it to open the menu, in segment commends you see speed > change segment speed > - 100% (this gives you reverse)

Please see p100 in the V14.5 user guide found in downloads > documentation for details.
