

## How to make a picture slides ?

Posted by Cyniras - 09 Jun 2019 04:36

---

Hi every one,

How can I do such things : [youtu.be/s7F2Cg-hhoA?t=55](https://youtu.be/s7F2Cg-hhoA?t=55)

You know, when the pic appears from the side ...

Thanks for your help !

Hello,

I suspect that the video you've linked to is made with special software for presentations, but I think it's possible to make something quite similar with Lightworks.

To move frames, the DVE effects with keyframes for the motion are the key.

Welcome to the forum.

You can use the 2D DVE for sliding into frame. However, you won't get motion blur with it. It's a matter of setting up the timing using keyframes.

However, motion blur is available as a user effect [www.lwks.com/index.php?option=com\\_kunena&func=view&catid=7&id=188603&limit=15&limitstart=75&Itemid=81#189501](http://www.lwks.com/index.php?option=com_kunena&func=view&catid=7&id=188603&limit=15&limitstart=75&Itemid=81#189501)

Thanks, to be honest I didn't understand how this Keyframes stuff works, do you have a tutorial video ?

It doesn't matter for the blur...

Setting up the timing using keyframes is complicated or is it just me ?

Setting up the timing using keyframes is complicated or is it just me ?

It is at least not intuitive. You should read the manual pages about keyframes, starting at page 188 of the current V14.5 User Guide.

The more honorable it is that you've posted in English. As a German I can say that. 🇩🇪
