

Audio out of sync

Posted by Eep88 - 09 Jun 2019 13:23

Hi, I'm new to Lightworks (video editing in general really)

Whenever I import video the audio is always out of sync; it's delayed.

I assume this isn't normal. Is there a way around this or have I done something wrong? All I've done so far is import the files, so I can't imagine I've done something wrong already!

Thanks

=====

Hello,

Please restart Lightworks and see if it helps.

If it doesn't, could you post your computer details and a Mediainfo report, please?
