

How do I achieve this ?

Posted by Haxnicks - 11 Jun 2019 07:15

I am trying to update the branding on this video. The 4 products on the "projector screen" near the start and the same at 1.31 secs. i have been trying to do this with a 3D DVE but I get black side bars on my overlaying picture (see jpeg attached). So my questions are

1) Is 3D DVE the best way to do this? and

2) if so how do I get rid of the sidebars - is it a case of using a different file type for the image or a sizing thing? And if a sizing thing, how do I know what size to make my image?

[attachment:2]SoftTie.mp4[/attachment]

I am not a professional editor so please keep answers as jargon free as possible! Many thanks.

Hello,

From what your screenshot shows, I would think 3D-DVE is the right tool.

You can get rid of the black bars on that image overlay with the 'Crop' controls, click on the little orange triangle to reveal. Scaling on the 3D-DVE is 'Position.Z'.
