

Black screen when adding vfx

Posted by johnathon - 12 Jun 2019 15:41

When I add a vfx like wipe or text whenever the preview goes over that part of the video it just shows a black screen

Hello,

If they shows black you have't applied them right, I would think.

In VFX mode, open the Routing panel, position the timeline marker on the text effect, make a screenshot and post it, please.
