

export audio

Posted by martmix - 13 Jul 2019 02:31

is it possible to export only audio as a wave..ect?

(edit)i just find it it's on the PRO version..

thanks

martin

As a free version user you are restricted in what you can export, WAV is only available as a PRO feature.

However, you can export your video and then use third party software to make a copy of the sound track.
