

## adding a new clip to an existing multicam bin - crashes lightworks

Posted by kalimerox - 14 Aug 2019 09:25

---

When I have an existing multicam bin and want to add a new clip to that multicam bin. Is this supposed to be possible? or do i need a new multicam bin from scratch? When I try it lightworks just crashes rightaway (14.5)

thank you!

That won't help you much, but I've just created a multicam bin with three clips synced by timecode and added 15 more in groups and one by one, 720p Cineform proxies, no crash.
