

How to rotate clip

Posted by Noddy0211 - 09 Sep 2019 01:47

I'm trying to rotate and import a new video clip into current file

Moderated - I've moved this into imports, however, your terminology may be a bit confused in the use of "imports" and "file", but I'm placing it here because of the initial impression of the message i.e. you wished to rotate before importing into Lightworks. Briandrys

Welcome to the forum.

You can't rotate and then import using Lightworks, you need to import and then place the clip into a sequence and then rotate using the DVE. If it's a phone video, you can use the format fixer: www.lwks.com/index.php?option=com_kunena&func=view&catid=7&id=188603&limit=15&limitstart=15&Itemid=81#189202
