

Basic Help

Posted by SamB1 - 12 Sep 2019 17:26

I need some beginner help, simply am not able to get the hang of tool.

I am trying to something very basic - **clip and stitch some videos** (thats' all for starters)- somehow not able to do it.

I am able to mark - start and end of my clips (portions of) - but after that I dont know what next. I would expect the net of all my clips - I should be able to export and be done - but somehow not being able to do this basic step.

Went thru some of the tutorial videos - they did not help.

Any specific tutorial/document anyone would suggest

Thanks

Sam

Welcome to the forum.

This thread has unofficial videos which go through things a bit slower. Note the mark and park instead of in and out link in one of the messages.
