

3D DVE Built In To Image Key Effect

Posted by Matthew_T - 05 Nov 2019 18:16

I tend to use image key quite frequently and I usually find that I would love to be able to rotate the picture, but to do so I have to add the 3D DVE effect and route it correctly to achieve this effect. I think it would be great to have as a convenience in future updates. Let me know what you think!

+ 1 for an Image effect with parameters for rotation.

Perhaps, it could solve [this problem](#) in one rush as well, without opening Pandora's box.
