

APPLICATION ONLY

Posted by JoshKennington - 29 May 2020 19:58

HELP!!!

I have been attempting to download the new version (2020.1) and the only option for installed component is the Application. No windows - how can I fix this issue? I just bought a monthly pro subscription and can't even access it.

So all fixed now?

By the way, you will probably experience a slight delay before your pro licence kicks in. I believe that they are handled during UK office hours. It shouldn't matter much - you can edit freely until it's enabled then export at full Pro resolutions.
