

## 2020

Posted by tuorost - 08 Jun 2020 09:50

---

I have downloaded the 2020 version. I have my project but no media. How can I import the media which is still on the computer. Barry

Welcome to the forum.

Is this a previous project (on V14.5), but the media has gone off line?

Or, are you asking about importing the media for a project?

Hello,

Difficult to say, based on the given information. Usually, and that's by design, an upgrade doesn't touch user projects, media, and settings, because the program is strictly separated from user data.

Saying this, it's very likely that you have done more than just installing the new version. The question is what?
