

## Transferring videos from mini DV tapes

Posted by CJPG - 18 Mar 2021 09:41

---

Hi,

I would like to transfer a load of videos from my camcorder onto my Windows 10 laptop. Can I do this using Lightworks? If so, how?

If not, can you please recommend some software (preferably free) which will transfer the videos onto my laptop?

I've tried Honestech TVR but the quality of the recording once transferred is quite grainy.

I then tried NCH Suite, but you are limited to 5 minutes per video, and then you have to buy a copy. The quality of the transferred video is better than the Honestech software.

So, basically I'd like some recommendations please. It would be great if I could use the Lightworks software to transfer the videos, but I guess it isn't possible.

Thanks,

Chris
