Installation / Drivers / Hardware / OS FAQ

Can I still use Lightworks Free version 11.1 or earlier?

The free versions prior to 11.5 no longer work. Only the Pro versions. Meaning you need to be a Pro user to still run versions older than 11.5.

The full Lightworks FAQ can now be found at www.lwks.com/faq

To use it, type a likely word or phrase into the Search field - it will display the most relevant answers, in much the same way as the search function in this forum.
