

A "Hints and Tips" unofficial PDF in progress

Posted by frandesouza - 12 Mar 2011 03:20

A few weeks ago I had begun to make this basic pdf file with some hints and tips on using Lightworks. I could not continue working because I'm a little short of time, but if you think it's worth I try to do more. Maybe there is some inaccuracy in my work, and for this reason I ask more experienced users to let me know so that I can correct the files.

It may be useful to those in first contact with LW.

Note:

I decided to keep the text of the original post, above, because I think that is part of the history of the forum and also because it is totally connected to other messages in this thread.

So here is the new document "Lightworks Hints & Tips" for version 11.

Many thanks to rhinox202, who kindly offered to revise and update the old document.

This time the hard work didn't fall on me 😊

Finally, those interested in translating the document to other languages just let me know via PM.

Cheers

NEW! LW Hints & Tips in Spanish:

NEW! LW Hints & Tips - Swedish, translated by sennahojx

Here is a German version (v10), translated by Max Besser:

Dutch version (v10), translated by Roel:

And here's a document by sennahojx on how to make titles with the free version of Lightworks:

English:

Swedish:

Note: I assume that if you're going to use these documents, you have read at least the Lightworks Quick Start Guide...

Do you know about <http://www.booki.cc/> ? And <http://booki.flossmanuals.net/> ?

It's free, online and lets more users work in the same text. It can export to pdf ePub and other formats. I think it can be used to translate the docs too - I haven't tried it yet though.

Here's a manual I've been working on a few evenings (it's still a work in progress):

[DVD slideshow GUI eBook](#)

Well, I don't know how this could work with the hints & tips pdf, since it is a work already compiled. I think it is required to start all from scratch again (not an option at this stage of the work).

If anyone wants to translate the document to another language, just send me an email through my profile page and I send back a link to the source files.

I don't post a public link to these files here just to get things under a minimum control.

Also, a German translation is already made, and a French one seems to be on the way.

What software do you use to edit the layout for the pdf?

I used Inkscape for the layout, saved as pdf, and joined all pages using PDF Split and Merge.

Hi,

thanks for the german file.

In this thread You can find the german translation from Lightworks user interface:

lightworksbeta.com/index.php?option=com_kunena&func=view&catid=24&id=3570&Itemid=269

In the moment it's not complete.

Bye

lue.

Thank you **frandesouza** for your work. I wanted to ask. Extension will be? Or at this end?

Hi, hatab4...Thanks for your words!

Since we have now a whole section with lots of video tutorials, I think this pdf could be considered a completed work. If the next beta releases include some important changes, I may consider to make specific updates. In fact, there is already a change in the present version, regarding audio nodes, but I've been kind of lazy to make a change on the document ☺

Hi Roel, I put your document at the first post of this thread.

Thanks for sharing it 😊

I just did a guide for how to adding text in the free version. And yes I did some advertising for the pro version.

Tell me if I write something wrong, typos, grammatical errors, etc. I'm thinking of making a Swedish version to.

Thanks for your effort with this - and thanks as well for promoting the Pro version, which is the easy way to do titles, and to support the Lightworks project.
