

A message to existing Lightworks Pro customers regarding the recent price changes

Posted by Site Admin - 03 Oct 2014 15:51

We recently sent an email announcing the release of Lightworks version 12. This notification also drew attention to changes to the pricing plans, stating that currently active subscriptions would continue to run until cancelled, unaffected by price changes.

It has been brought to our attention that all customers with a *currently active* Lightworks Pro license that was purchased before 28th January 2014 will have missed out on subscription and have therefore not benefitted from the unaffected renewal pricing. To thank these customers for their support, on Monday 6th October we will be upgrading their accounts, to offer the Lightworks Pro One Year license at close to the original price. The special pricing will be visible in the shop when signed in.

Many thanks for all your support!

The Lightworks Team
