

## Page continues to load.

Posted by donkpow - 28 Dec 2014 22:07

---

Even after the page is loaded in its entirety, the page continues to load. This is the only site that is doing it to me. I can't make it stop loading but I can refresh the page. Google Chrome Version 39.0.2171.95 m, Windows 7.

Seeing that here too on Google Chrome, Windows 8.1.

[EDIT] Whatever was going on seems to have gone away now, at least for me. Weird.
