

## New Lightworks Version 12.5.RC1 Now Available on Windows Linux and Mac OS X!

Posted by Matt Sandford - 06 Jul 2015 03:44

---

The next version of Lightworks 12.5 Release Candidate 1 is now available to download! This exciting new build not only improves the compression settings for YouTube export sizes but also now includes the ability to change the compression options for the new H.264/MP4, WebM and WMV export options, including choosing between Constant and Variable bitrates (Lightworks Pro only)

We are now approaching the release of 12.5. Please make sure any and all issues have been added to Redmine as the Beta Forums will soon be removed.

[Download here](#)

(Please read the Terms and Conditions and EULA outlined and tick the box to say you agree with them.)

For users wishing to see all the changes since 12.0.2 they can be found in the [Changelog pages](#) .

It is strongly recommended that users backup their project folder before installing any new Beta build of Lightworks.

Some of the exciting new features in version 12.5 can be seen below:

- Added UltraHD video output format option to the Video tab of the Project Card (Lightworks Pro only)
- Export option improvements (Lightworks Pro Only)
- Added H.264/MP4 export format (level 5.2) for more export options including 4K
- Added WebM export option, includes 4K
- Added XAVC-Intra export option, includes 4K
- Added support for XML export (Version 5 only)
- Added further improvements to AAF AVID Media Composer export option to allow media relinking to the original file if one exists
  
- Added support for LUTs .3dl, .looks, .cube, .davlut, and .mga files
- Added support for applying a LUT at the project level (Video tab of the project card)

- Added support for import of Cinema DNG files
  - New Content Manager improvements
  - Added a scroll bar to torn off groups
  - Added the ability to scroll bin tabs in a torn off group
  - Added the ability to right click a tab in a torn off group to display the bin list
  - Added the ability to resize a torn off group
  - Added the ability to add a Bin to more than one Group
  - Improved the colour of Group names within the content manager
  - Improved tab display of bins on torn off groups
  - Improved the Bin search within the content manager
  - Improved the behaviour of hovered clips
  - Removed the number limit of bins available in a group
  - Fixed inability to drag torn off bins into Groups within the content manager
  - Fixed bins being incorrectly merged when dragging and dropping a bin to a group
- And much more!

## Submitting Feedback

To submit feedback on issues found in the Beta versions:

- Firstly identify whether your issue is happening repeatedly or not. If you continue to experience the same issue doing the same steps, please submit a ticket directly using the Redmine ticketing system: [dev.lwks.com](http://dev.lwks.com)
- If your issue is not repeatable or you are unsure about how the application should be working, please first discuss the issue in the relevant category on the Lightworks Beta Forum section:
  - [www.lwks.com/windowsbetaforum](http://www.lwks.com/windowsbetaforum)
  - [www.lwks.com/linuxbetaforum](http://www.lwks.com/linuxbetaforum)
  - [www.lwks.com/macbetaforum](http://www.lwks.com/macbetaforum)
- If your thread in the Forum concludes as an issue within the Beta version, please summarise the thread and enter a ticket in the Redmine ticketing system: [dev.lwks.com](http://dev.lwks.com)

Users will be able to sign in to Redmine using your Lightworks Username and Password, if you are already signed in to the Lightworks Website you will be automatically signed in to Redmine. Detailed instructions on submitting useful information can be found on the Wiki page. Please make sure you have searched for the issue before submitting a ticket, this should help stop duplicate tickets being submitted. The more feedback we get, the faster we can resolve issues.

Matt
