

Welcome to the Version 12 Beta page.

Here you will be able to view the list of fixes/changes between Beta builds. Please pay particular attention to the "Limitations and Known problems" list, as this will change with each new build.

To submit feedback on issues you find in the Beta versions:

-

Firstly identify whether your issue is happening repeatedly or not. If you continue to experience the same issue doing the same steps, please directly submit a ticket using the Redmine ticketing system: dev.lwks.com

-

If your issue is not repeatable or you are unsure about how the application should be working, please first discuss the issue in the relevant category on the Lightworks Beta Forum section: www.lwks.com/macbetaforum www.lwks.com/linuxbetaforum www.lwks.com/windowsbetaforum

-

If your thread in the Forum concludes as an issue within the Beta version, please summarise the thread and enter a ticket in the Redmine ticketing system: dev.lwks.com

You will be able to sign in using your Lightworks Username and Password, if you are already signed in to the Lightworks Website you will be automatically signed in to Redmine. Detailed instructions on submitting useful information can be found on the Wiki page. Please make sure you have searched for the issue before submitting a ticket, this should help stop duplicate tickets being submitted. The more feedback we get, the faster we can resolve issues.

IMPORTANT: Any users running Blackmagic hardware will need to upgrade to the latest Blackmagic drivers 10.1 and higher, otherwise the Blackmagic Device will not be recognised.

Cross Platform Fixes and Features Since 12.0.3.f Beta:

- Fixed audio WAV files potentially not playing despite files being online and accessible
- Fixed double clicking a tile to a viewer not working properly if "Link bin tiles to viewers" is set to "No"
- Fixed potential crash handling lines greater then 32k in length
- Fixed ProRes MOV files created by Blackmagic Pocket Cinema Camera (BMPCC) importing as audio only
- Added new Italian Wordings file. Translated from English by Carmelo Battaglia
- Removed obsolete "Permissions" menu item on edits in shared projects
