Getting Started Video Tutorial

Lightworks is a full-featured professional video editor. Get to grips with the basics with our Quick Start tutorial: how to configure the Lightworks interface, start a project, import, play and manage media, add and remove material in the edit, apply effects, trim, mix audio and export your finished work.

Ready to learn more? Take a look at our [basic and advanced tutorials](#) and see [what's new in 12.5](#).
